

## PASSENGER ELEVATORS

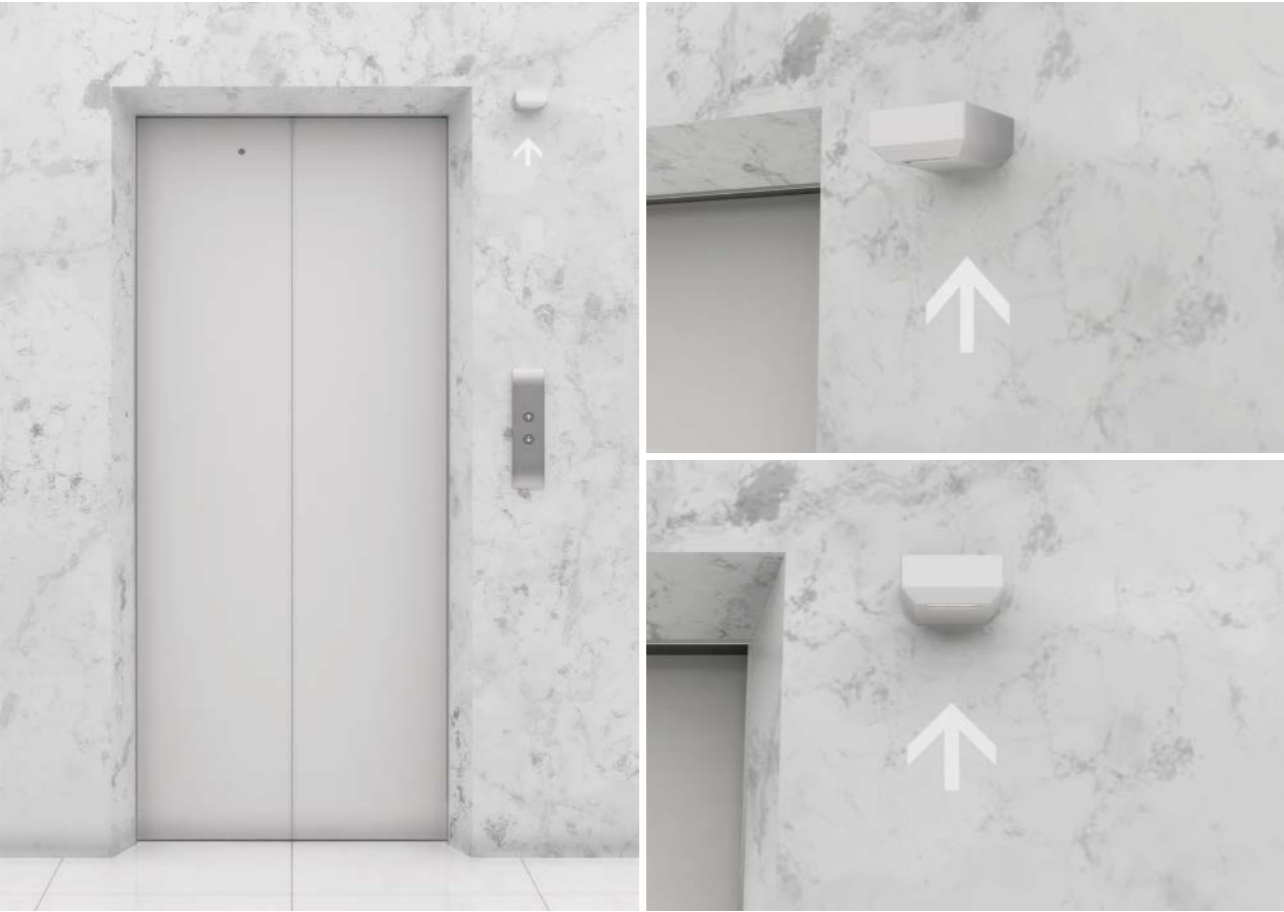

## Industry-Pioneering Projection Lantern

Blended with Architecture

New illuminating signs lure you to the destination

# An Inviting Product

A hall lantern that subtly guides the way using an illuminating sign.  
This unprecedented concept is embodied in an inviting product as a pioneer in the domain.  
The level of detail perfectly complements your carefully-considerate self.

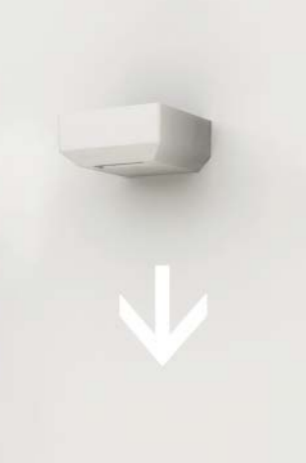

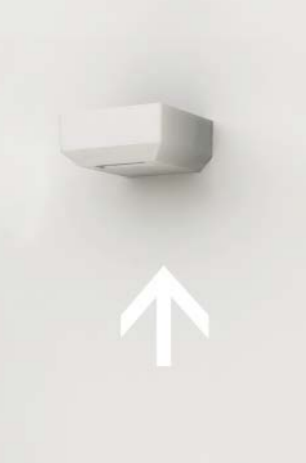

## Innovative

The industry’s first-ever hall lantern adopting a new method of projecting the elevator’s direction of travel on a building wall \*1. Users are offered a novel and innovative elevator experience. The minimalistic and sophisticated unit blends in without subtracting from the architectural design and helps make your building space concept a reality. \*1: Patent application to be filed

Non-illuminated state

Illuminated state

Screen

Alternates between two types of direction arrows, which are projected in the same position.

This hall lantern can be fitted onto any building wall work by applying a screen that secures the brightness of the direction arrows and conceals existing construction holes during modernization work.

## Expandable

Decorative covers are available to match a diversity of interior tastes. We can also tailor mount sign characters in line with your needs.

Decorative covers \*2

Examples of customized sign characters \*2 \*3

\*2: Use of decorative covers and customization of sign characters/color are optional or available by special order. Please consult our local agents for details.  
\*3: As per product specifications, there are two sign character types available for projection. When customizing your sign characters, the projected direction arrows must be one of the two types.

## Minimal Installation

A boxless design has been adopted in consideration of the building’s character. Installation is possible with minimal wall holes, contributing to labor savings in installation and minimizing architectural damage. Our lanterns are ideal for modernization as they can be effortlessly integrated with the architecture at a later stage.

## Other Lineups

A new hall button and hall position indicator have also been added to the lineup to match the new design.  
These boxless hall signal fixtures reduce the load on the architecture.
